Start: 10/24/2008 - 00:00

End: 10/24/2008 - 23:59

Timezone: Etc/GMT+2

Organisers:

Coast Day - AKTI Project and Research Centre

The "Coast Day" celebration represents the central event of a more comprehensive awareness-raising campaign, aiming to highlight the importance of environmental issues among the policy-makers and the local population, as well as to promote the implementation of a new Mediterranean Protocol on Integrated Coastal Zone Management (ICZM), signed in Madrid, in January 2008. For a second year, Coast Day will be internationally celebrated on the 24th of October (www.coastday.org). The aim of this event this year will be to promote information to the public about the Integrated Coastal Zone Management. To intrigue the public about the future of the coasts and his own. This effort is supported by United Nations Environment Program (UNEP) through MAP/PAP and the European Union through the SMAP program. In Algeria, Cyprus, Egypt, Greece, Lebanon, Morocco, Palestine, Italy's Sardinia, Syria, Tunisia and Turkey organized informative events and activities throughout October dedicated to the coasts, in an effort to inform the citizens
